FINAL-YEAR PROJECT REPORTS

I built the tool I wish I had for my project report

Guided writing, your department's format, and a finished Word document.

ProjectForge

THE PROBLEM

Most of us start the report with a blank page and a PDF of guidelines.

1. **Nobody shows you what goes where**
   What does the Statement of the Problem actually need to say?

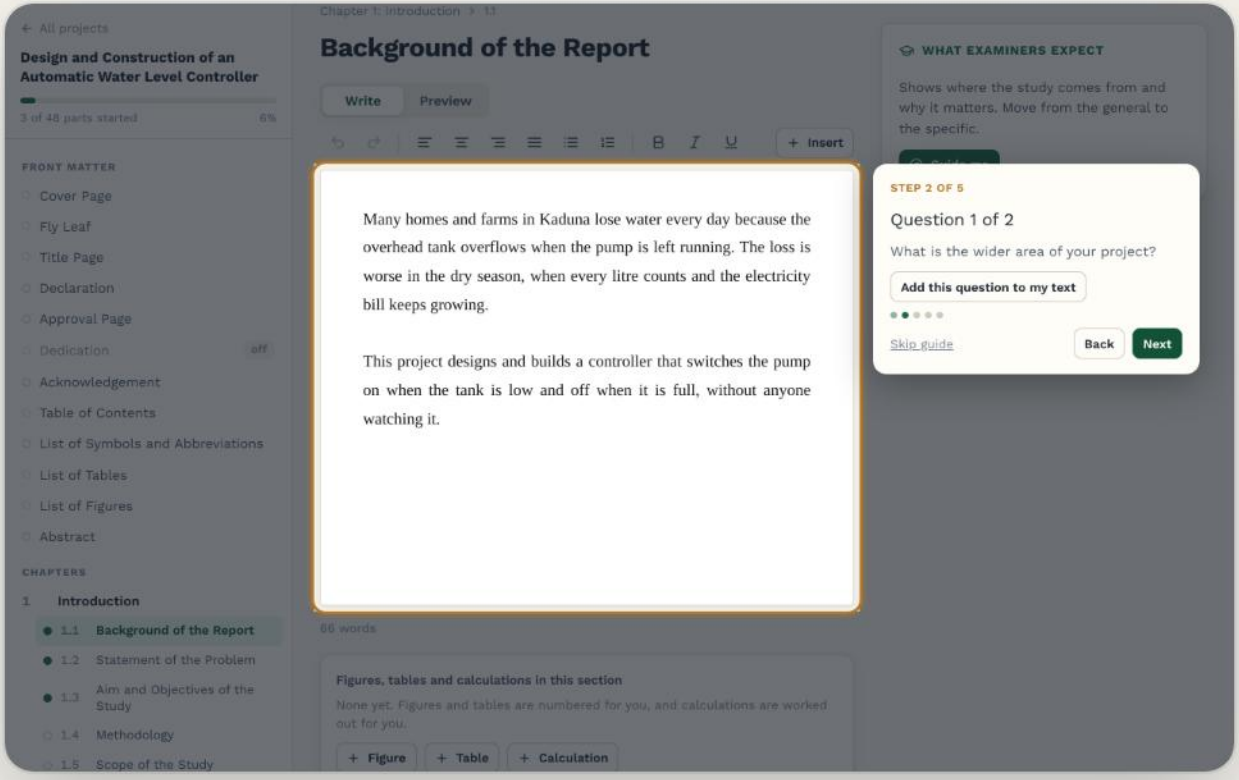

2. **Formatting eats your time**
   Margins, spacing, roman page numbers, figure numbers, the table of contents.

3. **Feedback arrives late**
   You only learn what was missing after the supervisor reads the whole draft.

4. **It happens on a phone**
   Many of us write between lectures, on data and on a small screen.

GUIDED WRITING

A guide that dims the page and walks you through every section

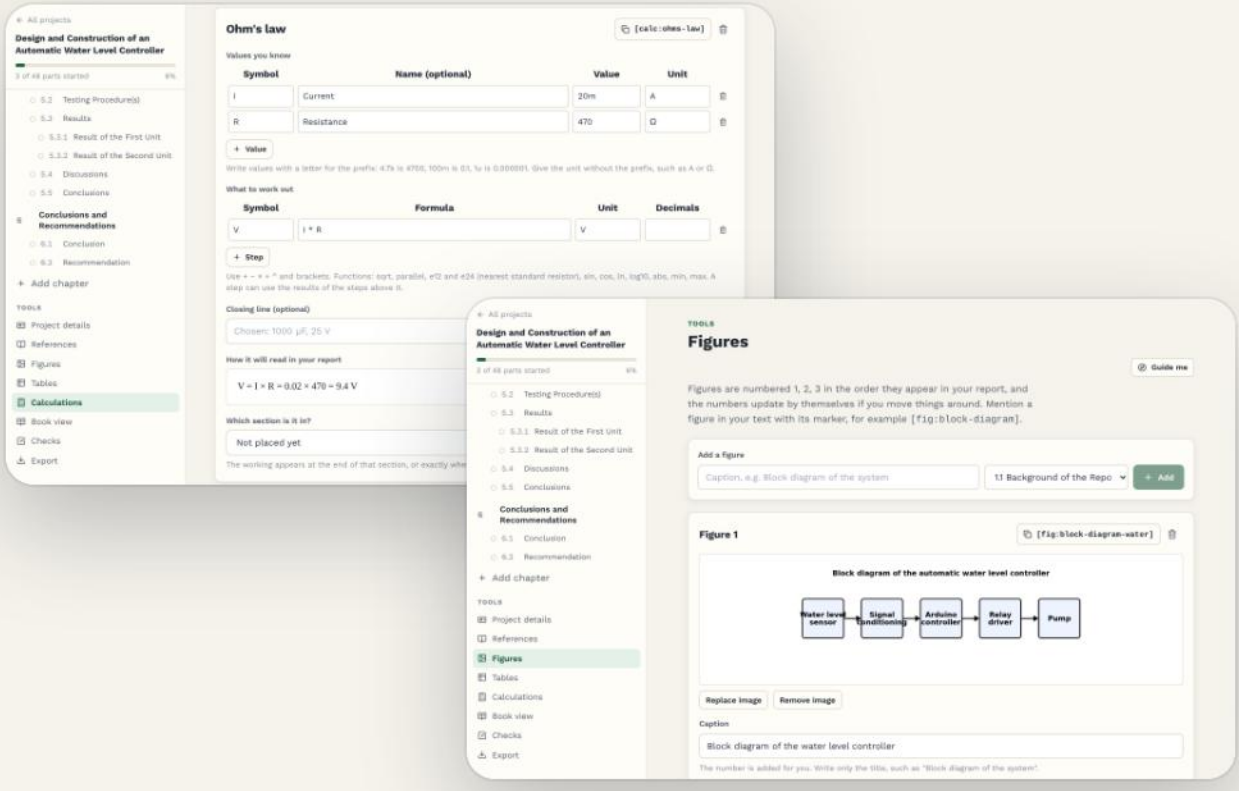

What examiners expect, the questions to answer, the common mistakes. It never writes the report for you.

ProjectForge

THE TOOLS

References, figures and calculations that do the boring part

IEEE or APA

Auto-numbered figures

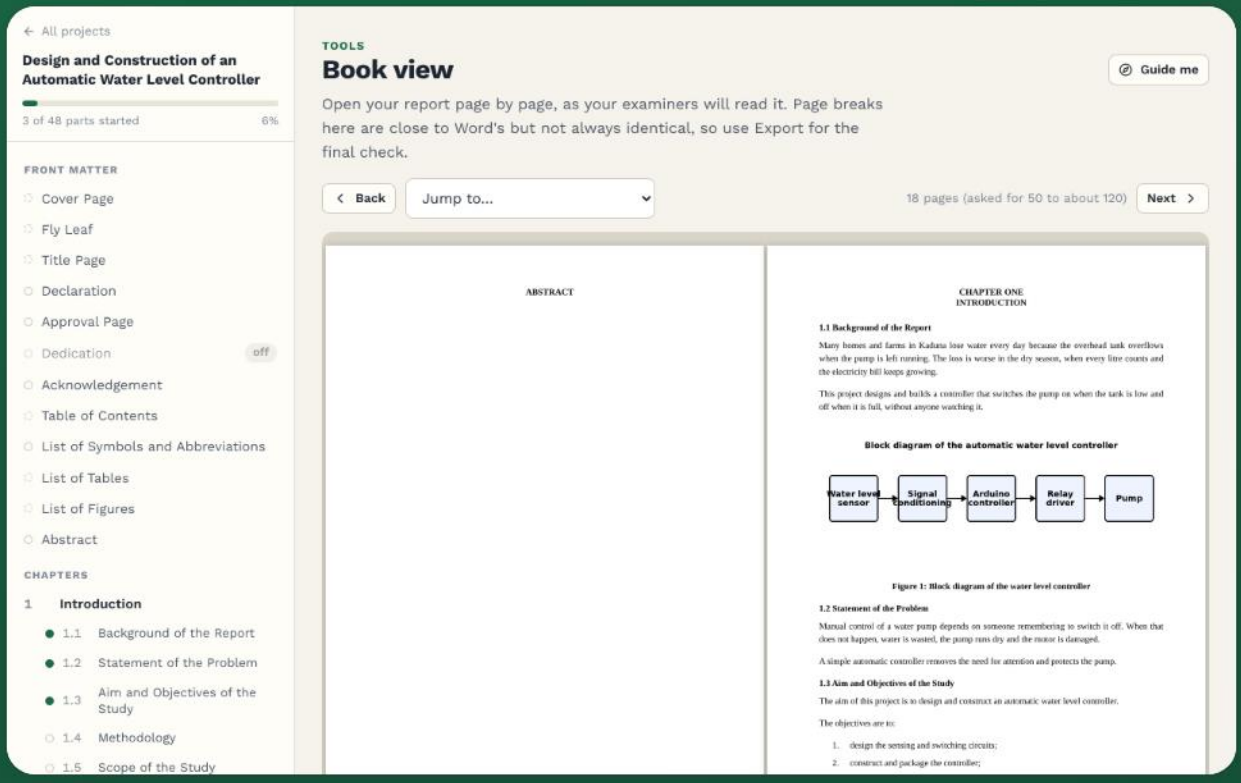

Worked calculations

Checks

ProjectForge

BOOK VIEW

Read your report like a printed book before you hand it in

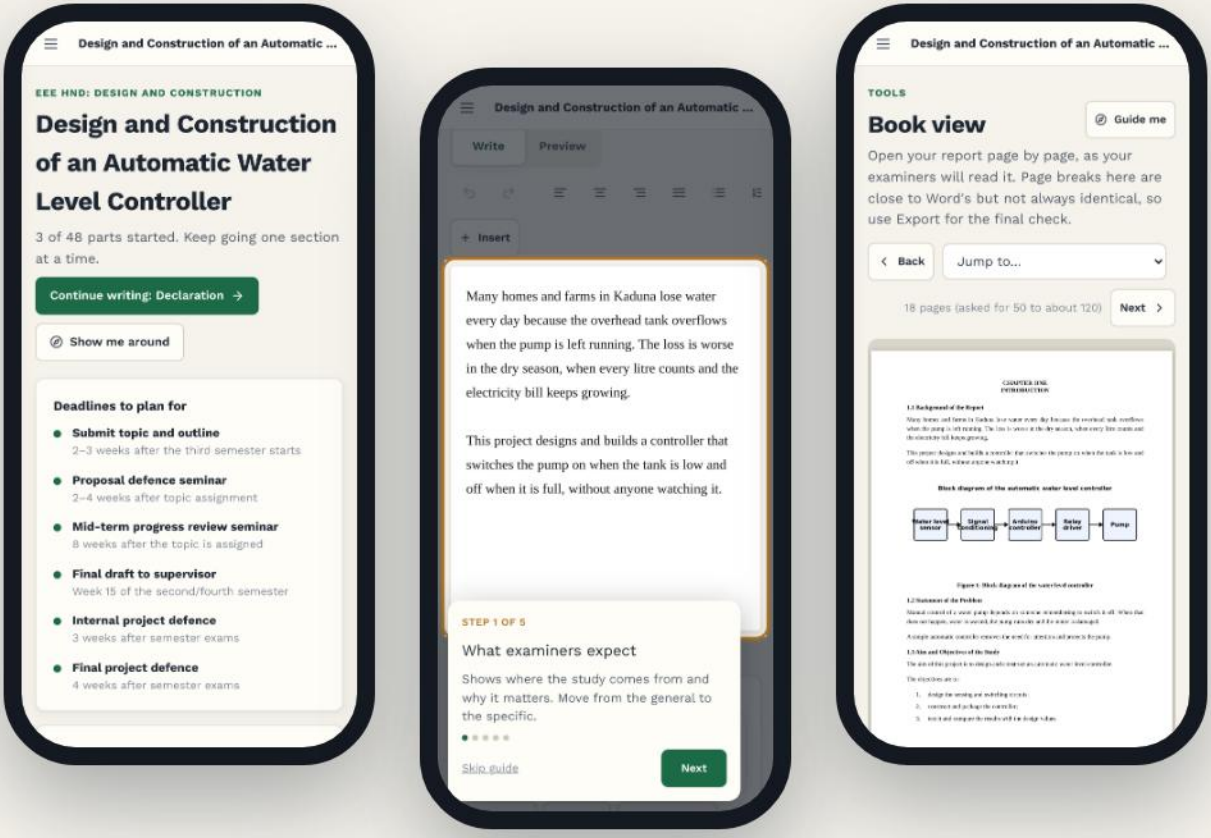

Cover, front pages, chapters, page numbers, then export to Word with the department's margins, font and spacing.

ProjectForge

BUILT FOR PHONES

Write, add photos and read your report from your phone

ProjectForge

TRY IT

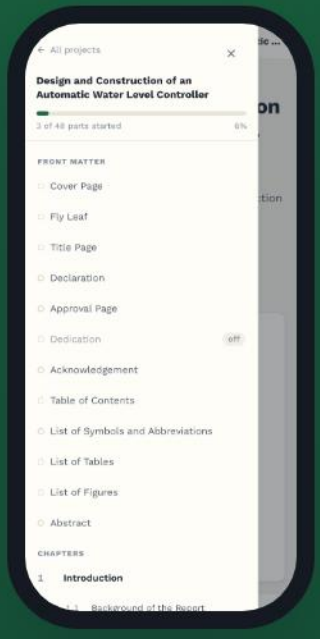

Free to try. Made for EEE HND students.

Follows the Kaduna Polytechnic guidelines for design and construction, and maintenance and repair projects.

1. **Sign up**
   Choose your project type

2. **Write section by section**
   With a guide at every step

3. **Download your Word report**
   Already formatted
